Abstract

This study aims to assess students' behavior and attitudes toward using artificial intelligence applications in education.

Our main objectives are to evaluate usability, address challenges related to the application, and analyze the difficulties students face.

Data will be collected through a questionnaire and a usability test, involving 50 participants from the College of Computing at Umm Al-Qura University, focusing on their experiences with AI applications in education.

The findings of this research may contribute to enhancing the adoption and use of AI applications in education, which will benefit students.

Introduction

Artificial intelligence applications are becoming increasingly prevalent in various domains, especially in education, where they play a crucial role in transforming the learning environment. These technologies aim to provide more personalized and efficient learning experiences for students, enabling them to access educational content in a way that is tailored to their individual needs. The adoption and effectiveness of these applications depend significantly on the attitudes and behaviors of students when interacting with them.

In this research, we focus on the role of artificial intelligence in education, specifically examining how these applications influence students' attitudes and behaviors. By understanding these factors, we aim to contribute to the development of more effective AI tools that can improve learning outcomes.

Problem statement

This study aims to evaluate the role of artificial intelligence applications in education, focusing on their impact on students' attitudes and behaviors. By understanding these factors, we seek to contribute to the development of more effective AI tools that enhance learning outcomes.

Research Objectives

The primary goal of this research is to study the impact of artificial intelligence applications on the attitudes and behaviors of computer science students. Specifically, the research aims to:

- 1. Analyzing Usage Patterns:** To examine how computer science students interact with AI-powered educational tools, including the frequency of usage and the most commonly utilized features.
- 2. Exploring the Impact on Learning:** To investigate whether computer science students integrate AI applications into their study routines and assess their impact on problem-solving skills, teamwork, and analytical thinking.
- 3. Assessing Adaptation and Acceptance:** To study the acceptance and adaptation of computer science students to AI technologies, focusing on their opinions regarding the reliability and fairness of AI-powered tools. This includes measuring their satisfaction with features such as adaptability and ease of use.
- 4. Identifying Tangible Benefits:** To explore students' perspectives on how AI contributes to enhancing their understanding of computer science topics, such as programming, artificial intelligence, and software engineering, and improving their academic performance and learning efficiency.

Key Concepts

1. Artificial Intelligence

Artificial intelligence refers to the ability of a machine to simulate human cognitive functions such as learning, reasoning, and problem-solving. AI systems can be designed to perform tasks that typically require human intelligence, such as decision-making, pattern recognition, and language processing. In the context of education, AI is used to create intelligent tutoring systems, adaptive learning platforms, and automated grading tools that can support students' learning processes.

2. Attitudes

Attitudes refer to students' feelings, beliefs, and perceptions toward using artificial intelligence in education. These attitudes can influence how students engage with AI-powered educational tools and their willingness to incorporate these tools into their learning routines. A positive attitude may lead to increased use and better outcomes, while negative attitudes may hinder the adoption of such technologies.

3. Students' Behaviors

Students' behaviors encompass how they interact with and respond to AI-powered applications. This includes their frequency of use, the features they prefer, and how they integrate AI tools into their study habits. Understanding students' behaviors is crucial for evaluating the effectiveness of AI applications in enhancing learning experiences.

Recruitment Screener:

Introduction:

Hello, We are a team from the Software Engineering Department, conducting a study aimed at understanding the behaviors and opinions of computing college students regarding the use of artificial intelligence applications in their education. The purpose of this survey is to ensure that you meet the required criteria to participate in the research sessions. Please note that completing this survey does not automatically guarantee your participation, as participants will be selected based on the alignment of their responses with the research requirements.

Research details:

- The research sessions were conducted remotely via the Zoom program, and afterward, the participants answered a survey related to the research.

Types of Data Collected:

The data in this research was collected using a survey and usability testing. The data included two main types:

- Quantitative Data: This included closed-ended responses such as the frequency of application usage, confidence levels in artificial intelligence, and task completion time, which can be analyzed statistically.
- Qualitative Data: This included open-ended responses about user experiences, improvement suggestions, and challenges encountered while using the application, which were analyzed using content analysis methods.

Session Timing:

- The interviews will be conducted from November 24 to February 4 and will most likely be scheduled at times convenient for the participants.

We look forward to your cooperation to ensure the success of this study and achieve its intended outcomes. Thank you for your time!

Question 1 :

Age

- Under 20 years
- 20 to 25 years
- Over 25 years

Question 2:

- Gender
- Male
- Female

Question 3 :

Marital Status

- Single Never Married
- Married

AI APPLICATIONS IN ACADEMIC ASSISTANCE

- Divorced
- Widowed

Question 4 :

Educational Qualification

- No formal qualification
- High school diploma
- Bachelor's degree
- Master's degree
- Doctorate degree
- Vocational or technical training

Question 5 :

Are you a student in the Computer Science major

- Yes
- No

Question 6 :

What is your grade level

- 1
- 2
- 3
- 4

AI APPLICATIONS IN ACADEMIC ASSISTANCE

- 5
- 6
- 7
- 8
- 9
- 10
- 11
- 12

Question 7:

How often do you use artificial intelligence applications in your education

- Daily
- Weekly
- Rarely
- Never

Question 8:

What activities do you use artificial intelligence applications for You may select more than one option

- Completing assignments
- Designing models or interfaces
- Improving academic writing
- Learning programming concepts

AI APPLICATIONS IN ACADEMIC ASSISTANCE

- Research and analysis
- Exploring innovative ideas
- Other areas please specify

Question 9 :

Which artificial intelligence application do you primarily use

- ChatGPT
- Grammarly
- Google Bard
- Other please specify

Question 10:

How confident are you in using artificial intelligence applications to improve your academic tasks

- I do not trust them at all
- I trust them to a small extent
- I trust them to some extent
- I trust them completely

Question 11

What kind of device do you mainly use in your education choose one

- Desktop

AI APPLICATIONS IN ACADEMIC ASSISTANCE

- Laptop
- Tablet
- Smartphone

Question 12:

What operating system does your main device use in your education choose one

- Windows
- macOS
- Android
- iOS

Question 13:

How would you describe your level of technical expertise in using smart devices and applications choose one

- Beginner
- Medium
- Advanced
- In the know

Question 14:

What are the main challenges you face when using smart applications in your education Select all that apply

AI APPLICATIONS IN ACADEMIC ASSISTANCE

- Difficulty in use
- Technical problems
- Lack of resources
- Unwillingness to use technology
- Other please specify

in Applications AI Toward Behaviour 'Students Understanding Brief: Recruitment Education

students: Brief Computer Recruitment in a Include to Logistics of Summary

Item	Details
Research by	Human Computer Interaction
Date of Research	15 December, 2024
Location	Online
Number of Participants Needed	50 Participants
Length of Session	3 minutes
Incentive Amount	Volunteer work

Participants' Characteristic Included in the Recruitment Brief Computer students:

Number of People Needed for The Research	Characteristics to Include in the Recruitment Brief	Who You Want to Talk To
25 participants	Regularly use e-learning applications	Undergraduate Students
25 participants	Have prior knowledge of technologies such as programming or modern technological tools	Students with Previous Technology Experience

Survey on the Use of Artificial Intelligence Applications Among Computer Science Students

Question 15:

How confident are you that AI applications help improve your learning skills

- I don't think they help
- They help to a small extent
- They help to some extent
- They help significantly

Question 16:

Do you think using AI in your studies will enhance your academic efficiency

- I don't think it will contribute
- I think it will contribute slightly
- I think it will contribute moderately
- I think it will contribute significantly

Question 17:

Do you use AI applications for all your educational tasks

- Always
- Often
- Sometimes
- Never

Question 18:

Do you face any difficulties in using AI applications

- Always
- Often
- Sometimes
- Never

Question 19:

Do you think AI can replace traditional learning methods

- Strongly agree
- Agree
- To some extent
- Neutral

Question 20:

How easy is it for you to use AI applications in the learning process

- Strongly agree
- Agree
- To some extent
- Neutral

Question 21:

How satisfied are you with the technical support you receive when using AI applications in education

- Strongly agree
- Agree
- To some extent
- Neutral

Question 22:

Do you use artificial intelligence to improve your academic productivity

- I always use it to organize my productivity and complete tasks quickly
- I often use it when I need to organize or facilitate some tasks
- I sometimes use it but I prefer traditional methods to manage my time and tasks
- I never use it because I don't think it affects my productivity

Question 23:

Do you think artificial intelligence can help you improve your time management and study organization

- Strongly agree I believe AI helps me significantly in organizing my time and managing tasks
- Agree I think it can help to some extent but I rely on my own methods
- To some extent I don't think it helps much I prefer relying on traditional methods
- Neutral I don't see AI as useful for organizing my time

Question 24:

What is your most remarkable experience using AI applications in your studies

Long answer text

Question 25:

What challenges do you face when using AI tools

Long answer text

Survey Analysts

AI APPLICATIONS IN ACADEMIC ASSISTANCE

السؤال الرابع والمخترون:
ما هي تجربتك الأكثر تميزًا عند استخدام تطبيقات الذكاء الاصطناعي في دراستك؟

59 ردًا

الملاحظات وإعداد أسئلة للمراجعة	القيم السريع
لا اعتمد عليه في جميع مشاريعي ولكن جربت ان اعتمد عليه في احدها ولم تكن تجربته سيئه	
وضع اسئلة	
تلخيص وعمل اسئلة لاختبار فهمي	
في البحوث	
طلب تبسيط المفاهيم المعقدة	
لا يوجد	
كالتعليق والحوث التي كانت تستغرق ماني ايام واسابيع مع الذكاء الاصطناعي لاستغرق سوى دقائق = اختصار للوقت وللجهد	

السؤال الثالث والمخترون:
هل تعتقد أن الذكاء الاصطناعي يمكن أن يساعدك في تحسين تنظيم وإدارة وقتك الدراسي؟

59 ردًا

أوافق بشده أرى أن الذكاء الاصطناعي يساعدني بشكل كبير في تنظيم وقتي وإدارة المهام

أوافق أعتقد أنه يمكن أن يساعدني إلى حد ما لكنني أعتقد على طريقي الخاصة

إلى حد ما لا أعتقد أنه يساعد كثيرًا وأفضل الاعتماد على الأساليب التقليدية

معايد لا أرى أن الذكاء الاصطناعي يمكن أن يساعدني في تنظيم وقتي

السؤال الرابع والمخترون:
ما هي تجربتك الأكثر تميزًا عند استخدام تطبيقات الذكاء الاصطناعي في دراستك؟

59 ردًا

الاجراء ملحصات وتنظيم المهام
تسهيل المعطومه وتوصيلها بطرق تناسبني
عندما تكون المعطومه مؤكده
احل اسرع
استخدامه في شرح الدروس والترجمة
رائعه و ممتازة
شرح الفقرات التي لم افهمها او ايجاد الاخطاء
يسهل المعطومه وإذا احتجت شرح تفصيلي بشرحها وسريع بجلب المعطومه
Coding

السؤال الرابع والمخترون:
ما هي تجربتك الأكثر تميزًا عند استخدام تطبيقات الذكاء الاصطناعي في دراستك؟

59 ردًا

عند الشرح
انه يشرح ويحل كل شيء صعب ويطريقه مبسطه ايضا
استخدامه في شرح السلايدات وبعض المشاريع افهمها والتأكد من طريقة عملها
اطلب مساعدته في فهم موضوع معين بشكل اعظم، فيشرحه لي بالتفصيل الممل حتى ادركه
يلخص لي ويشرح لي المعلومات المعقدة
يشرح
اعطاء افكار

السؤال الرابع والمشرون: ما هي تجربتك الأكثر تميزاً عند استخدام تطبيقات الذكاء الاصطناعي في دراستك؟ 59 رأ تحسن في فهمي للمحتوى التعليمي ترجمة الكلام بطريقة مريحة حل الواجبات أول بأول good at explanation and content summray , content write عندما استخدمه في شرح العمليات المنطقية مثل البرمجة والعمليات الحسابية يساعد في فهم المواد الدراسية بشكل أكثر فعالية ويقفل من الحاجة للبحث بشكل تطبيدي قدرته على شرح جميع المواضيع سواء كان شرح أو فهم كود أو تصحيح اخطاء عدم الوثوق بها	السؤال الخامس والمشرون: ما هي التحديات التي تواجهها عند استخدام أدوات الذكاء الاصطناعي؟ 59 رأ لا يوجد مشاكل تقنية الاجابات الخاطئة لا يوجد ولا شيء اثق ان اكبر مشكلة هي كثرة الاعتماد ع أدوات الذكاء الاصطناعي دون فهم فقط (الانتاج او الحل).. مما يسبب عدم فهم الشخص وقفل في انتاجيته الدراسية والاكاديميه بعض الأحيان تكون الاجابة عن السؤال غير صحيحة ومنطقية لكنه يثبت العكس دقة الاجابة من: عندما
السؤال الرابع والمشرون: ما هي تجربتك الأكثر تميزاً عند استخدام تطبيقات الذكاء الاصطناعي في دراستك؟ 59 رأ في هيكله الاكواد شرح المفاهيم عبر المفهومه مساعدتي في إنجاز المشروع تنظيم وقتي وتسهيل علي بعض المهامات يعطيني معلومات مفصلة عن كل معلومه ابحت عنها تلخيص لا يوجد يساعد دوما في توضيح الأمور بشكل مبسط ويسير 	السؤال الخامس والمشرون: ما هي التحديات التي تواجهها عند استخدام أدوات الذكاء الاصطناعي؟ 59 رأ دقة الاجابة من: عندما صعوبه مباحه السؤال لفهمه صديق ولا لا لا اجد لم اواجه تحديات وجود الأخطاء لا اواجه مصادقيه المصادر وجود اخطاء احبانا

السؤال الخامس والعشرون: ما هي التحديات التي تواجهها عند استخدام أدوات الذكاء الاصطناعي؟ 59 ردًا لا توجد تحديات فقط قم بتدريج وتهيئة الـ AI على الموضوع او المهمة الخاصة بك. لا شيء عدم صياغة سؤال مناسب فإ تاتي مخرجات خاطئة موثوقية المصادر عدم مشاركة أكثر من ٧ صور صحة المعلومات فهم الذكاء الاصطناعي للأوامر المطلوبة محدودية بعض المواضيع مشكلة في الشبكة إنها ليست موثوقة ٪١٠٠	السؤال الخامس والعشرون: ما هي التحديات التي تواجهها عند استخدام أدوات الذكاء الاصطناعي؟ 59 ردًا limit of use, not always give the right solution for a code not always know how to fix an error سواء فهم الذكاء الاصطناعي لما أريد أو قلّه الكفاءة في أداء بعض المهام التي لا تتعلق بالمنطق أو المهام التي تتطلب بالتصميم والصور وغيرها من الأمور قد لا تتوفر اللغة المناسبة أو قد يتطلب دفع مبلغ مادي أو قد يكون منهم الفائدة أو قد يجنوب بطريقة منخفضة اللغة أو قد يجنوب بشكل خاطئ ٥ كون مزايا الذكاء الاصطناعي عالية تكون خلف حاجز مالي لازم ادفع و اذا يعني ما استخدمه يومياً فما احسن يسوى الأخطاء الكثيرة ١ أعيد صياغة السؤال أكثر من مرة عشان يعطيني الإجابة التي احتاجها أحياناً اذا قمت بإرسال ملف تتعطل البرنامج.
السؤال الخامس والعشرون: ما هي التحديات التي تواجهها عند استخدام أدوات الذكاء الاصطناعي؟ 59 ردًا الحد وما يفهمني لا يوجد معلومات كافية التأكد من صحة الإجابات في بعض الأحيان يفهم المستخدم بشكل خاطئ لذلك يأتي بمطومة خاطئة لا Misunderstanding عدم فهم الذكاء الاصطناعي واستيعابه للمطلوب صعوبة تحميل الملفات مشاكل تقنية	السؤال الخامس والعشرون: ما هي التحديات التي تواجهها عند استخدام أدوات الذكاء الاصطناعي؟ 59 ردًا أعيد صياغة السؤال أكثر من مرة عشان يعطيني الإجابة التي احتاجها أحياناً اذا قمت بإرسال ملف تتعطل البرنامج عدم وجود المعلومات التي احتاجها خروجه عن الخدمة أحياناً الإنترنت يعطيني معلومات خاطئة في بعض الأحيان م يفهم سوالي صح نقص الموارد

1 .Test Objectives:

Moderated Remote Usability Testing: conducted via Zoom. Participants will share their screens while performing tasks, and the session will be recorded for later analysis.

Main Objective :

Evaluate the usability and effectiveness of an AI-powered application in summarizing articles, focusing on ease of use and quality of the provided results .

Detailed Objectives:

- 1 .Assess the accuracy and comprehensiveness of summaries generated by the application .
- 2 .Evaluate how easily participants can navigate and use the application's features .
- 3 .Measure user satisfaction with the speed and reliability of the application's responses .
- 4 .Identify challenges or usability issues encountered during task execution .
- 5 .Provide actionable insights and recommendations for improving the application .

2 .Participants:

Target Group:

Computer Science students at Umm Al-Qura University .

Number of Participants:

5 participants .

Criteria:

- 1 .Basic experience in using digital applications .
- 2 .Interest in using technology to enhance learning and academic performance .
- 3 .Willingness to participate in a remote session via Zoom .

3 .Test Type:

Moderated Remote Usability Testing: conducted via Zoom. Participants will share their screens while performing tasks, and the session will be recorded for later analysis.

Tools Used:

- 1.Zoom: For video meetings and screen sharing during the test .
- 2.Think Aloud Protocol: To encourage participants to verbalize their thoughts while interacting with the application, providing deeper insights into their experience .

Task Description:

Participants will use the application to summarize an article by exploring different features such as AI-powered chat .

Task Goals:

- 1 .Evaluate the efficiency of the application in delivering accurate and comprehensive summaries .
- 2 .Understand how participants interact with the app's various tools and features .

4 .Task Preparation:

Tasks:

- 1 .Log into the application .
- 2 .Paste the article into the application in preparation for summarization.
- 3 .Use the available tools (AI chat)
- 4 .Share feedback on the accuracy, ease of use, and overall experience.

Participant Setup:

1. Provide participants with a pre-selected article for the task.
2. Introduce the participants to the features of the application .
- 3 .Explain the importance of thinking aloud during the session to capture their real-time feedback.

6 .Post-Task Questions:

Application Interaction

1 - Was it easy to find the tools needed to summarize the article?

- Very easy
- Easy
- Neutral
- Moderate

AI APPLICATIONS IN ACADEMIC ASSISTANCE

- Difficult

2 - Did you encounter any difficulties while generating the summary?

- No difficulties
- Some difficulties
- Neutral
- Many difficulties
- Major difficulties

User Interface

3 - How would you rate the design and layout of the application?

- Excellent
- Very good
- Neutral
- Good
- Acceptable

4 - Were the options and features clearly labeled and accessible?

- Very clear
- Clear
- Neutral

AI APPLICATIONS IN ACADEMIC ASSISTANCE

- Moderately clear
- Not clear

Features

5 - How accurate and useful were the summaries provided by the application?

- Very accurate and useful
- Accurate and somewhat useful
- Neutral
- Moderately accurate and useful
- Not accurate and not useful

Overall Experience

6- Do you think the application met your expectations for summarizing articles?

- Exceeded my expectations
- Met my expectations
- Neutral
- Somewhat met my expectations
- Did not meet my expectations

Suggestions for Improvement

7- What improvements would you suggest for the application's functionality or interface?

Open-ended answer

8- Are there any additional features you would like to see included?

Open-ended answer

7 .Task Outputs:

1-Determine the success rate of participants in finding a summary of the article .

2-Measure the time taken to complete the tasks.

3-Record the difficulties and challenges that participants faced during the task.

4-Provide improvement suggestions based on participants' comments.

Number of participants	Specialization	Time taken to complete the task	Difficulties and challenges during task completion	Comments
1	Cybersecurity	49 seconds	No difficulties were encountered.	A new feature was suggested to be added
2	Data Science	3 minutes and 30 seconds	No difficulties were encountered.	It was suggested to improve the user interface by customizing colors and fonts. Additionally, it was recommended to integrate with other applications such as Google Drive, Twitter, and GitHub to enhance the user experience.
3	Computer Science	2 minutes and 15 seconds	No difficulties were encountered.	Design improvements were suggested to enhance aesthetics.
4	Information Systems	50 Seconds	No difficulties were encountered.	It was suggested that all AI-powered learning tools be free and unlimited.
5	Data Science	2 minutes and 2 seconds	No difficulties were encountered.	It was suggested to improve the accuracy of AI-generated summaries and add a feature for precise summarization of long audio files.

1.60% of the participants found that locating the necessary tools for summarizing the article was very easy, indicating that the app's interface or the method of accessing the tools was clear and smooth for most users. Meanwhile, 40% of the participants found it easy but with some minor challenges, suggesting that there is room for improving the user experience to make tool accessibility even easier and more seamless.

2.100% of the participants reported that they did not encounter any difficulties while creating the summary, indicating that the summarization process was smooth and user-friendly within the app.

3.60% of the participants rated the app's design and layout as excellent, indicating that the design was clear, easy to use, and provided a positive user experience. Meanwhile, 40% of the participants rated it as very good, suggesting that there are some aspects that could be improved, but they did not significantly impact the overall user experience.

4.60% of the participants found that the options and features were very clear and easily accessible, indicating that the user interface or the way options were presented was effective and smooth for most users. Meanwhile, 40% of the participants found the options clear but with some minor challenges, suggesting that there is room for improving the user experience to make feature accessibility even more seamless and intuitive.

5.80% of the participants found that the summaries provided by the app were highly accurate and useful, indicating that the app delivers reliable information and high-quality summaries. In contrast, 20% of the participants considered the accuracy and usefulness of the summaries to be moderate, which may suggest the need for some improvements in the summarization method or the inclusion of important details.

6.40% of the participants felt that the app met their expectations regarding article summarization, while another 40% found that it exceeded their expectations, reflecting overall satisfaction with the app's performance in this area. In contrast, 20% felt that the app met their expectations to some extent, which may indicate some gaps or areas for improvement.

الاقتراحات للتحسين

7- ما التحسينات التي تقترحها على وظائف التطبيق أو واجهته؟

5 ردود

السعر
دقة ملفات التلخيص التي ينتجها الـ AI
إضافه بعض الجماليه للتطبيق
إضافة ميزات جديدة
تخصيص الالوان و الخطوط

7. Based on participant suggestions, there are five key areas for improvement:

1. Pricing: There is a need to review the pricing model, either by offering flexible subscription plans or a free model with premium features.
2. Summary Accuracy: Some users request improved accuracy in summaries, highlighting the need to enhance algorithms or introduce a manual review feature.
3. Aesthetic Design Improvements: Some participants believe the app could benefit from visual enhancements to make it more appealing and user-friendly.
4. New Features: There is demand for additional features to enhance the user experience, requiring a study of user needs.
5. Interface Customization: Users express interest in customizing colors and fonts according to their preferences.

8- هل هناك ميزات إضافية ترغب في إضافتها؟

5 ردود

لا

التلخيص عبر الملفات صوتيه طويله بدقه

لاشيء

كما قلت اضافة ميزات تفاعله جديدة

التكامل مع تطبيقات اخرى مثل قوقل درايف و تويتر و github

8.40% of the participants do not see a need for additional features, indicating their satisfaction with the app. However, 60% suggested improvements, including:

1. Support for high-accuracy audio summarization for long files.
2. New interactive features to enhance user experience.
3. Integration with applications like Google Drive, Twitter, and GitHub to improve productivity and ease of access to content.

Key Constraints and Challenges Faced in the User Research Project on AI Applications in Education

In this project, which targeted computer science students to study the impact of AI applications in education using Surveys and Usability Testing, we encountered several constraints and challenges, including:

Constraints:

1. Time Constraints – We had to adhere to a strict timeline, limiting the scope of data collection and analysis.
2. Data Accuracy Verification – Ensuring the accuracy of survey responses and usability testing results was crucial.
3. Participant Recruitment – It was challenging to convince a sufficient number of computer science students to participate in the study, affecting the sample size.

Challenges:

1. Conflicting Ideas Within the Team – We had to align our perspectives on the research questions and data analysis methods.
2. Achieving Team Cohesion – Effective teamwork required balancing different thought processes to ensure high-quality results.

Addressing These Challenges:

- A clear timeline was established to manage time effectively.
- Data was carefully reviewed to ensure accuracy.

Despite these constraints and challenges, the project provided valuable insights into how students interact with AI applications in education, leading to meaningful recommendations for enhancing the user experience in this field.

Raghad Majed Alkabkabi	First Assignment: - Preparing the consent form. - Preparing the submission file. - Contributing to the preparation of the questionnaire. - Reviewing the questions with the professor, writing comments, and making corrections. Second Assignment: - Collecting the work of group members. - Organizing and formatting the work. Third Assignment: - Creating two questions as distributed among the group members. - Including all questions in the questionnaire. - Publishing the questionnaire. - Reviewing the questions with the professor, writing comments, and making corrections. Final Assignment: - Conducting two interviews. - Preparing the questionnaire. - Contributing to writing the questions. - Reviewing the questions with the professor, writing comments, and making corrections.
-------------------------------	---

	Final Submission: - Contributing to the preparation of the Word document. - Compiling all assignments.
Ghala Saleh ALkabbabi	Task 1: - Design a recruitment brief - Contribute to the preparation of the questionnaire Task 2: - Write an introduction for the project Task 3: - Write two questions - shared the survey Final Task: - Data analysis Final Submission: - Create a Word document - Review and format the file according to APA style
Munira Misfer Al Zahrani	Assignment 1: - Prepare an employment screening tool. Assignment 2: - Verify consistency between Assignment 1 and Assignment 2.

	Assignment 3: - Prepare two related questions. Assignment 4: - Contribute to usability improvement. - Conduct an interview. - Analyze the results. - Attach a reference. Final Assignment: - Writing the Abstractor. - I assisted in compiling and editing the files for the final delivery.
Gala Abdulrahman Al Zahrani	Task 1: - Prepare the consent form - Contribute to the preparation of the questionnaire. Task 2: - Write an introduction to the project Task 3: - Create two questions and distribute them to the group members. Final task:

	- Prepare the file and analyze the data Contribute to writing the questions. Final submission: - Contribute to the preparation of the Word document
Rana Hamedan Althomali	First Submission: - I prepared the recruitment brief. Second Submission: - I wrote the research objectives and reviewed them with my friend. Third Submission: - I wrote two survey questions and shared the survey with my friends. Final Submission of Research Tasks: - I conducted an interview with one of the participants and participated in preparing the report. Final Submission of the Research: - I contributed to formatting the final document, made some edits to the introduction, and also reviewed the survey questions.
Shahad Mohammed Alheiani	Task1: - Participation in the development of a recruitment assessment tool.

	Task2: - Writing objectives. Task3: - Contributing to the development of research survey questions. Task4: - Participating in conducting interviews and generating participation reports.
